Profile

I'm a UI/UX designer with 9 years of experience across banking, fintech and healthcare, from product teams in Saudi Arabia and Canada to startups and software agencies in Egypt.

I work with a lot of attention to detail and a real love for beauty. I believe a well-designed experience can make people's lives easier, and that is what I try to build with every project, and I keep the details right while doing it.

Experience

Senior UI/UX Designer · Alinma Bank

Riyadh, Saudi Arabia · Dec 2022 – Present

I design Alinma's digital products and support the bank's full development team, from first requirements to developer handoff.

- **Products:** Maak app, WatheQ App, Alinma Website and Al-Shariah app, plus internal portals, dashboards and AI Initiatives.
- **Mobile Design System:** I own and grow the bank's internal mobile design system in Figma: 135+ components (1,600+ variants) with light and dark themes.
- **Web Design System:** I extended the system to web: 150+ components (2,700+ variants) and 460 variables, with responsive modes for mobile, tablet and desktop.
- **Adoption and teamwork:** I built the Maak app and WatheQ on top of the system, and I work daily with business owners, developers and QA, so every screen ships with its flow, prototype and specs the team can build from.

Product Designer · Preventia Technologies

Canada (remote) · Sep 2021 – Nov 2022

- Designed Algomed, a healthcare platform that connects patients with doctors and nurses, through a mobile app and a dashboard for care teams.
- Shaped the patient experience: medical records, appointment booking, subscription plans and in-app chat.
- Built a new design system that gave product and dev teams one shared language.
- Took each feature from user journeys and site maps to wireframes, high-fidelity mockups and prototypes.

Product Designer · Paymob

Cairo, Egypt · Jan 2019 – Jul 2021

- Part of the early product team at Paymob, an Egyptian fintech startup. The company later raised a US$50M Series B, co-led by PayPal Ventures, the largest fintech Series B in Egypt at the time.
- Designed the merchant dashboard, an Android POS app, the company website and checkout iframes for merchants and their customers.
- Ran competitive analysis, qualitative and quantitative research, and design sprints to shape each new feature.
- Worked with stakeholders and the product team to set direction.

UI/UX Designer · Alalmiya Alhura

Software agency, Mansoura, Egypt · Jan – Dec 2018

- Designed mobile apps for clients across the Middle East.
- Also worked on websites and other projects, building a solid foundation in product design.

Earlier roles

- **Freelance:** Designed Ghazal, an Arabic food and grocery delivery app, and Tutor, a teacher app.
- **Graphic Designer, Artac for Training & Consultation**
- **UI Designer, Tqnee** (software agency)

Skills

- **Design systems:** Component Libraries, Design Tokens, Documentation, Cross-Platform Consistency
- **Design:** Product Design, UI/UX Design, Interaction Design, Wireframing, Prototyping, User Research, Usability Testing, Accessibility, Responsive Design
- **Tools:** Figma, Photoshop, Illustrator, Google Analytics, SmartLook
- **Also used:** Adobe XD, InVision, Zeplin, Miro

Education

- **Bachelor's Degree in Computers and Information**,
  Mansoura University, Egypt · 2012 – 2017

Certifications

- **Interaction Design Foundation** · 2020, Online UX courses with certificates
- UX Design Patterns with Checklist · Design Terminology · UX Design Foundations · UX Designer from Scratch
